

# My Story, Your Story, Our Story.

*A narrative-based website project.*

# Topic Brainstorm

- My initial thought for the “diversity” prompt was ways to find more representation for people of color, specifically within the Asian demographics.
- I knew right away that I wanted to create a website-based project.
- However, my topic seemed way too broad and required ***much*** more research outside of the given time constraints that we had for the quarter.
- After narrowing it down, I decided to make a website-based project on the diversity within the Filipino-American community, which is a project that ended up feeling a lot closer to home for me.

# Comps

- My compositions took two approaches: an illustrative approach and a photographic approach.
- I decided to go with the latter, because it gave the project another level of authenticity and made it much more personal.

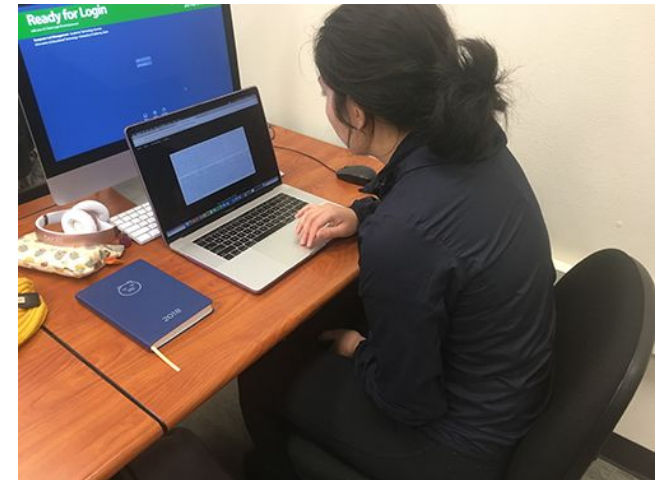

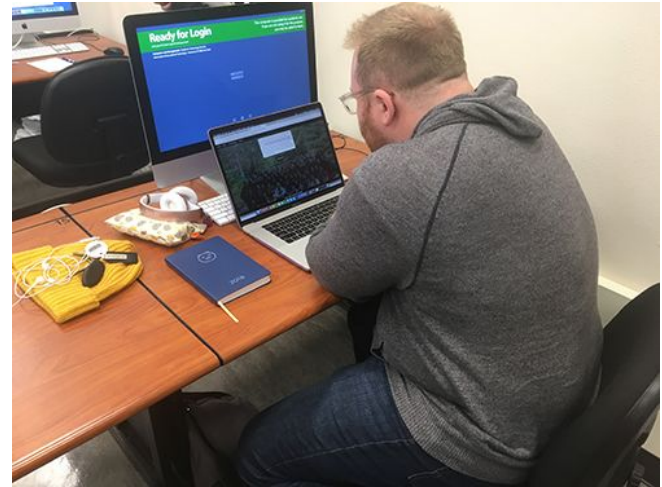

# Prototypes

- One of the things that I learned how to do between each prototype is improve upon the “one page website.”
- The slideshow feature on the very top of the page works, too! Nice!
- [Prototype 1](#)
- [Prototype 2](#)

# Target Audience Testing

- Adam and Sophia both gave me really good critiques on how to make the website more visually appealing.
- They also gave me good feedback on the readability of the text and the navigation.
- I was able to gain a better understanding of how other people navigate my website.

The image displays five hand-drawn wireframes for a social media application, arranged in two rows. Each wireframe represents a different screen in the app.

- Top Left Wireframe:** A screen for creating a story. It features the text "My Story, Your Story, Our Story." at the top, followed by a large "ENTER" button.
- Top Middle Wireframe:** A profile view screen. It has a navigation bar with "HOME | ABOUT | NARRATIVES | CONTACT". Below the bar is a circular profile picture placeholder, a bio section with fields for "this is where the profile description would go" and a "VIEW" button, and a "FOLLOW" button at the bottom.
- Top Right Wireframe:** A screen showing three story thumbnails. Each thumbnail has a circular image placeholder, a name field, a year field, a major field, and a "VIEW" button.
- Bottom Left Wireframe:** A screen for viewing a story. It features a circular image placeholder with the label "IMG" and a series of horizontal lines representing text.
- Bottom Middle Wireframe:** A screen for interacting with a post. It has a navigation bar with "HOME | ABOUT | NARRATIVES | CONTACT". Below the bar is a section for "GO ANY QUESTIONS? COMMENTS? CONCERNS? SHOW ME AN E-MAIL?". This section includes input fields for "NAME", "E-MAIL", and "MESSAGE", followed by "RESET" and "SUBMIT" buttons.
- Bottom Right Wireframe:** A screen showing a confirmation message: "Thanks! Your e-mail has been sent. Please allow up to 1-2 days for a response." Below the message is a "BACK" button.
